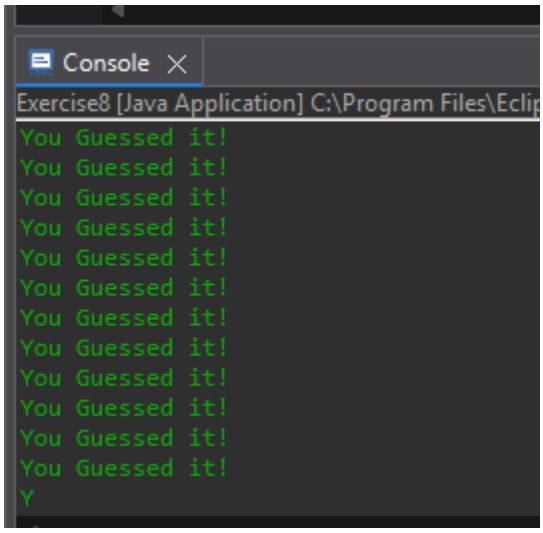
1) **What error message did you encounter (if any)?**
   I did not encounter any error message, but the program infinitely displayed the “you guessed it!” message once the user guessed the correct answer

2) **What unexpected behavior did your program exhibit?**
   The program would infinitely display the “you guessed it!” message, and eclipse would ultimately crash.



3) **What caused the issue? (e.g., syntax error, logic error, incorrect function usage, etc.)**
   The issue was caused by a handling error. I forgot to break free from the while loop, so the message was infinitely displayed

```
if (guess==rando)
{
    System.out.println(green+"You Guessed it!"+reset);
}
else
{
```

4) **How did you fix the issue?**
   I added a break; line after the message was displayed to end the loop.

5) **Provide the corrected code or solution using a screenshot.**

```
if (guess==rando)
{
    System.out.println(green+"You Guessed it!"+reset);
    break;
}
```
