1) **What error message did you encounter (if any)?**
I did not encounter any error message, but the program wouldn't display the method feetcentimeters when I entered 2

2) **What unexpected behavior did your program exhibit?**
The program would stop working when I picked the second converter option

3) **What caused the issue? (e.g., syntax error, logic error, incorrect function usage, etc.)**
The issue was caused by a handling error. I had accidentally defined the first choice twice and had forgotten to make the program accept the input "2"

4) **How did you fix the issue?**
I defined choice == 2, and removed the double statement for if choice == 1

5) **Provide the corrected code or solution using a screenshot.**
